SUMMARY:

Adaptable Full Stack Engineer with over a year of hands-on experience building scalable applications using Java, Spring Boot, JavaScript, and React at Redfin. Backed by formal training across two intensive software engineering bootcamps, bringing a strong foundation in modern web development, clean architecture, and continuous learning. Eager to join a collaborative team where I can expand my technical expertise and drive meaningful product contributions.

TECHNICAL SKILLS

Front End: React, Redux, Javascript, HTML5, CSS, Bootstrap, Material-UI

Back End: Node.js, Express, Java, Spring Boot, GraphQL, MySQL, PostgreSQL, Hibernate

Testing: Jest, JUnit

Developer Tools: Git, NPM, Docker, Netflix Conductor, JIRA, AWS, Heroku, Netlify

EXPERIENCE

Software Engineer - Redfin

Sep 2021 - Nov 2022

- Modernized the RedfinNOW iBuying platform using Java, Spring Boot, React, GraphQL, and PostgreSQL to automate home valuation workflows and reduce initial offer generation time from weeks to under 10 minutes
- **Backend Automation:** Designed backend microservices and Netflix Conductor workflows to auto-generate initial cash offers, cutting manual workload by ~60% and automating price tuning on ~80% of transactions
- **Frontend Optimization:** Developed responsive React and Reflux components for scoring models (e.g., Walk Score, Flood Risk); migrated computational logic to the backend to improve frontend load times and reduce client rendering times
- **Data Integration:** Extended PostgreSQL queries via Hibernate and GraphQL to surface real-time offer score feedback for Investment Specialists

PROJECTS

September 2026

Get Fluent | React, JavaScript, Java, Spring Boot, MySQL <https://getfluentcreole.netlify.app/>

- Built and deployed a full-stack language-learning platform that helps users learn conversational Haitian Creole through interactive phrase browsing, flashcards, and quizzes
- Built a React/Vite frontend with React Router for navigation and Axios for API communication, including custom UI components (3D flip-card flashcards, context-based modals)
- Developed a RESTful Spring Boot backend with JWT-based authentication (Spring Security) and a MySQL database (via Spring Data JPA/Hibernate) modeling users, phrases, flashcards, and quiz history
- Implemented core features including account registration/login, personalized flashcard sets with study-status tracking, quizzes with score history, and public educational resources on Haiti

EDUCATION

LaunchCode

May 2026 - Sep 2026

- Software Engineering Bootcamp

Hack Reactor

Mar 2021 - June 2021

- Advanced Software Engineering Immersive
